

Celebrate the Bald Eagles Road to Recovery

Includes a life-sized paper mache Bald eagle (BE) and a scaled-down version of a nest, designed to captivate your visitors. The BE exhibit measures 8' high and 4' wide canvas backdrop supported by a 6' long and 4' wide base. The exhibit documents the BE's successful recovery from its Federally-listed status under the Endangered Species Act and current protection. In-depth information on NY's BEs and other facts are provided on a portable, 3-sided kiosk 6' high x 32" wide/per side.

Learn About Our Creatures of the Night

Features a 3-D model of a summer roost tree and bat hibernaculum, a man-made bat house, and variety of interesting bat facts - fun for all ages. The "bat cave" is 8' high x 4' wide and supported by a 6' long x 4' wide base. A second part of the exhibit includes our portable kiosk measuring 6' high x 32" wide/ per side. Although primarily featuring the endangered Indiana bat, this exhibit offers general bat information, including the latest on the White-nose syndrome, a newly discovered disease.

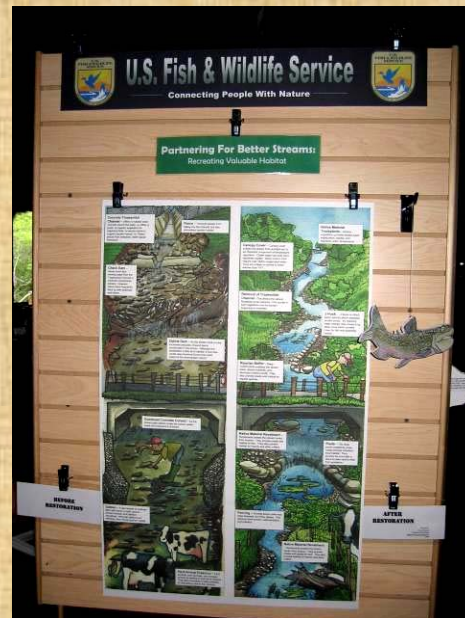

Celebrate Rachel Carson's Centennial 1907-2007

This photo/document exhibit commemorates the life and accomplishments of Rachel Carson. Breaking many barriers, Carson was only the second woman to join the U.S. Fish & Wildlife Service as a professional biologist. Throughout her career, she performed valuable biological work and released many publications. Her most famous publication, *Silent Spring*, is credited for galvanizing the environmental movement of the 1960s and inspiring a future generation of environmental activists. This exhibit is displayed on a felt covered frame that measures 10' high x 8' wide x 2' deep.

Partnering for Better Streams

Focusing on the U.S. Fish & Wildlife Service's Partners for Fish & Wildlife Program, this exhibit features information about stream restoration, how it occurs, and why it's important. With interactive elements including "Flip-Fact-Fish," a descriptive before and after poster, and local destinations to observe stream restoration, this exhibit will prove interesting for all ages. Presented on a 3-sided kiosk, that measures 6' high x 32" wide/per side.

Wind Turbines on the Landscape

Our "Wind Turbines on the Landscape" exhibit includes a 4' x 4' tabletop display (3' high in front and 4' high in back), a portable kiosk measuring 6' high x 32" wide/per side, a migratory bird/bat mobile, and our newly published activity book entitled, "Climate Change, Greening Energy: An Eagle's Eye View" featuring Barry the Bald eagle. The exhibit informs the public on wind energy (construction and transport of turbines) and its impact on fish wildlife.
